Collaborative efforts of Cochrane Russia and Cochrane China in Evidence-Based Policy showcase the power of synergy in guideline assessment and development

Collaboration of Cochrane Russia and Cochrane China to support evidence-based policy-making through new guideline assessment and development instruments

Background: Cochrane Russia and Cochrane China work together since 2023 on the basis of a collaboration agreement between their host institutions - Russian Medical Academy for Continuing Professional Education (Moscow, Russia) and the Institute of Health Data Sciences Lanzhou University (Lanzhou, China), a globally recognized pioneer in guideline assessment and reporting tool development.

RIGHT Statement and Checklist

Translating into Russian and publication at Kazan **Medical Journal and RIGHT-website**

RIGHT extension addressing conflicts of interest and funding (RIGHT-COI&F): survey on the ease of understanding

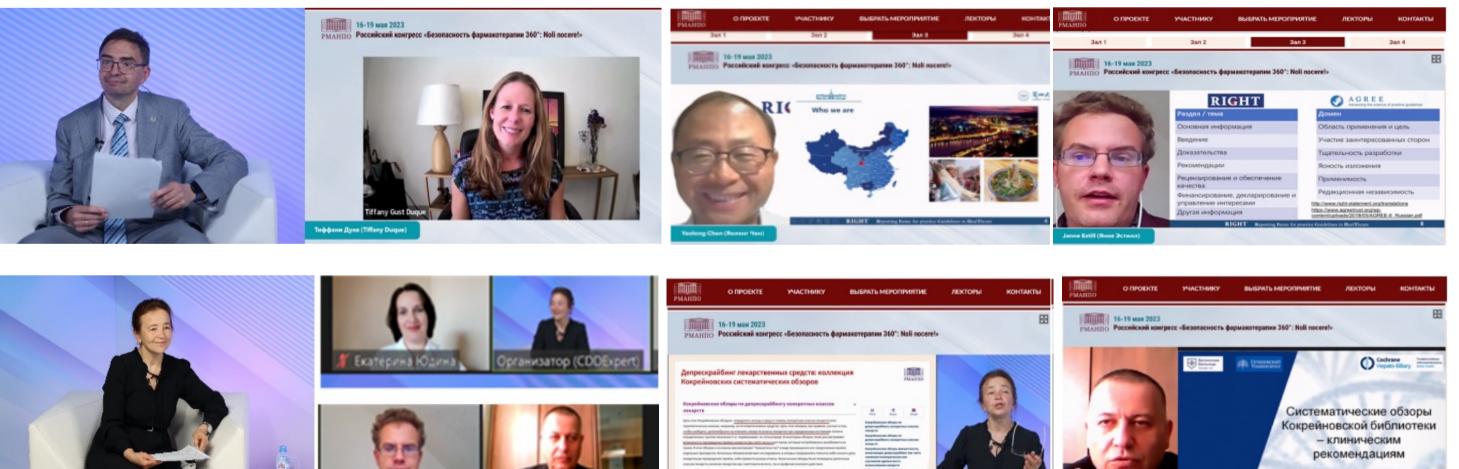

Translating into Russian and sending to target users and stakeholders in Russia (87 responders)

Educational co-events

2023 May

September

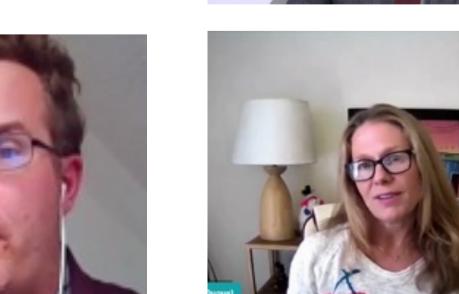

Cochrane workshop «Evidence-based clinical guidelines for the safety of pharmacotherapy»

Russian-Chinese scientific 2023

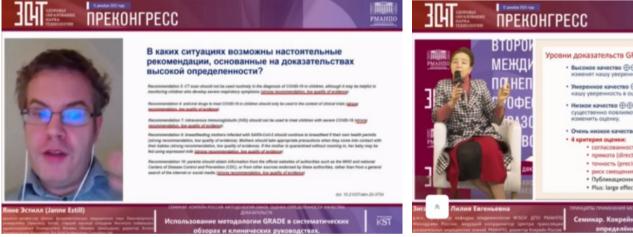

2023 December

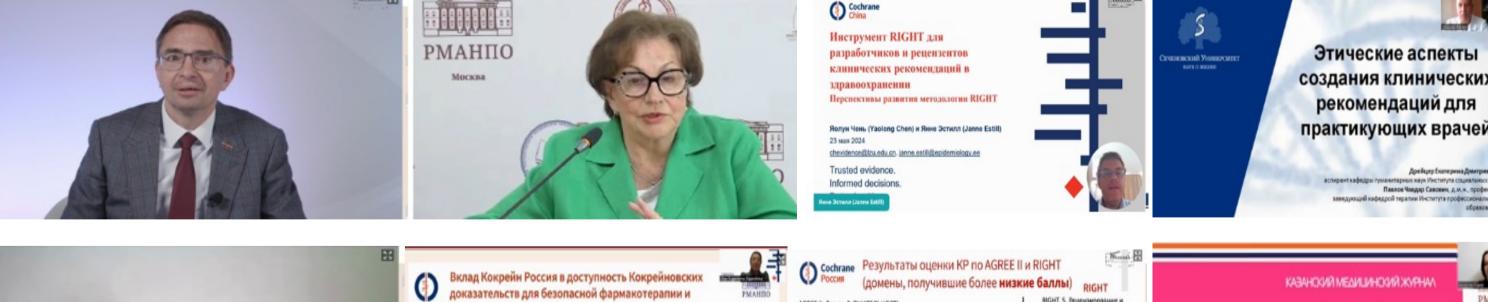

Cochrane workshop «GRADE methodology: assessing the certainty (quality) of evidence»

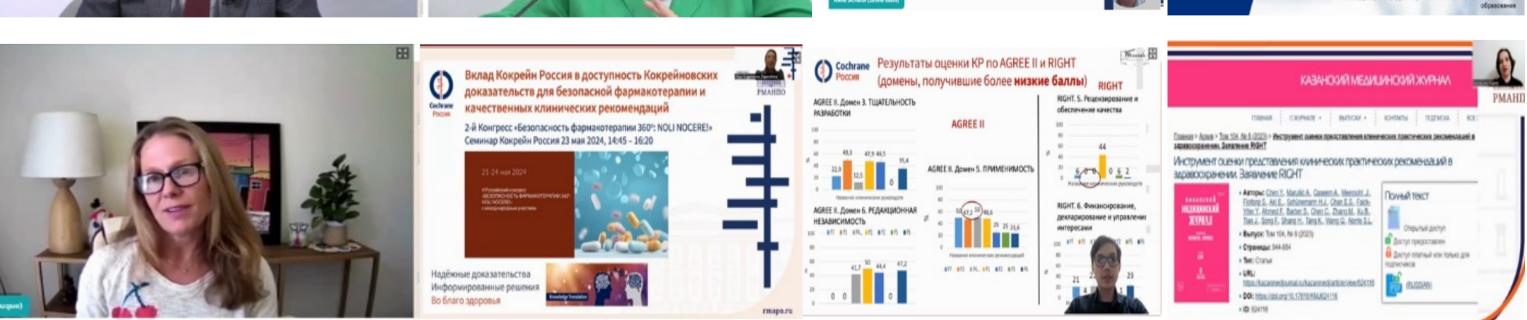

2024 May

Cochrane workshop «New tools for developing and assessing the quality of evidence-based clinical guidelines for safety of pharmacotherapy»

Conclusions: The first year of active cooperation has proven our collaborative model a success.

Further development will build on harnessing the power of synergy in guideline assessment and development.
